Aluminum Shelving Standard, 35% less in weight than fiberglass or wire; shelves Designed to support a 250 lb. load. **Optional fiberglass shelves are available, contact factory.**

GENERAL DESCRIPTION, TQ Series: High strength, fire resistant fiberglass (fire retardant grade ASTM-E-84 Class 1, UBC Class 2 and Torch Test 1) combines the best properties of glass fibers laminated with premium grade polyresin in a continuous molding process to produce a rugged, heavy duty truck. Continuous molded fiberglass structure, minimum thickness .18", bottom and caster mounting to be 1.00" min. with encased plywood. Construction allows the unit's body to be impervious to steam, acid, bleaches and other chemicals. Seamless interior means easy cleaning; use any sanitizer that you may choose; may use cart washer. High industry acceptance, because the T.Q.-FIBERGLASS CARTS are not sensitive to heat, will not melt, distort or deteriorate (like Thermoplastic Polys) when exposed to 200°F+ heat. the T.Q.-FIBERGLASS CARTS are ideal for climates of extreme temperatures.
