MIGHTY MITE

Please contact us to discuss your installation and this product.
800-826-1245

The **MIGHTY MITE** lint filter is used to reduce fire hazards and minimize drying time, due to settled lint or built up in a long duct run. This is a perfect "cost effective model" for any dryer using 4" or 6" exhaust ducts (dorm, guest laundries, health clubs, etc.).

Dryers will perform more efficiently for longer periods of time and dryer lint can be removed conveniently when needed at one easy to access location.

Clean Cycle Systems 25+ years of manufacturing filtration systems allows us to offer you complete engineering and technical assistance assuring perfect installation every time. Parts are readily available and ship immediately - to any destination in the world.
